

# Product Quality and Safety Policy

*Dear Customers, Suppliers and Employees,*

*Thank you very much for your trust by cooperating with us. Your opinion is important for us. We do our best to meet our customer requirements and keep close cooperation with our interested parties.*

*We have created a quality and product safety policy for you to provide the framework for Elpes Sp z .o.o. strategic direction of development.*

***The main objective of ELPES is the printing of laminate and production of laminate tubes, made of ABL and PBL. Processes include flexo printing on laminate, welding, cutting of tube body, adding shoulder, top seal and cap. Final stage is packing. We achieve our goal taking attention to environmental protection, product safety and sustainable development. ELPES' organizational culture is based on experience, a well-coordinated team and responsibility.***

*ELPES sp. z o.o. improves the level of product safety and quality standard in accordance with the Quality Management System and commit to meet the requirements of PN-EN ISO 9001:2015, BRC Packaging Material v6, legal and regulatory requirements, customer and own requirements. The Management Board implements a plan for the development and continuous improvement of the safety culture and product quality.*

*Our company actively monitors and applies new technological solutions to achieve the highest quality products. Organization priority is to cooperate with the best suppliers, comply with delivery and quality target as well as building good relationships with customers and interested parties.*

*The Management Board of Elpes is committed to printing and producing high-quality laminate tubes that can also be used in the food industry, because the entire Elpes team cares for and meets legal requirements that ensure the safety of our products has a great impact on the health of consumers. We ensure compliance with good manufacturing practice and carry out hazard analysis, identification and monitoring of Critical Control Points in to eliminate potential and real health risks starts from the receipt of raw materials to the release of the finished product to the customer.*

*The management of ELPES creates working conditions supporting development and innovation. The company's activities are guided by following the principles of energy efficiency policy and risk management. We focus on effective communication, teamwork and cooperation at all levels within the company.*

*ELPES employees and the Management Board are committed to continuous improvement of the quality management system and product safety culture. The methods used to continuously improve the quality management system and process optimization allow for a correct risk assessment and prevention of existing threats. Above actions contributes to reducing operating costs.*
